Subject: pool house info

David Giles and I repaired the map sign at the pool area today (I actually just held the wood in place while David did the repair). After we took a look at the pool house. In general, the building seems to be in good shape. There is a need to touch up/paint a few areas, one board that may need to be replaced due to rot and the roof needs to be nailed back down. We both suggest perhaps replacing the roof. It is tin and not terribly expensive.

On another point, I plan to locate the ARD in the bathroom area of the pool house. It would be readily accessible for those who might need it. The storage box is alarmed and the alarm will sound and a red strobe type will flash when the AED is removed. I hope to have the AED installed Tuesday, or Wednesday
