DIRECTORS AUGUST 16, 2017 MEETING**

**AGENDA ITEM VII
COMMITTEE REPORTS**

Whitewater Springs Pool Report August 2017

In July there was a power surge that blew out both of the chemical pumps, fried the power cords and destroyed the GFI outlet that everything was plugged in to.

The cost of the pumps was covered by the lease agreement but the other equipment was not.

Total cost for the service call, parts and labor was \$312.14

RFE and invoice was submitted for payment 7/14/2017.

In early August a family was at the pool and had an umbrella open. A wind gust snapped the umbrella pole. Luckily no one was injured.

I have not replaced the umbrella yet but expect the cost to be around \$175.

One of the filter pumps is making noise like the bearings are going out. I think we can get the bearings replaced for less than ½ the cost of a new pump. Parts and labor should be around \$300 but I have not got a quote yet.

Ray Beran, David Carmichael and I want to thank everyone for helping keep the pool area clean and putting the trash in the trash can and the pool toys back in the bucket.

Thanks,

WWS Pool Committee

Sam Locke

Only thing to report from the Wildlife folks is the Big Lake sign, Van is going to get it redone and then we will set it into the ground. We are also going to clear out around the Big Oaks at the big lake and push the burn pile into a smaller footprint so we can bur soon.
